

COPPINGER STARTS
FOR THE BANNOCKSDEPARTMENT COMMANDER
TAKES THE FIELD.

On His Way From Omaha Today to Direct the Campaign in Person—Four Troops of the Ninth Cavalry Hurrying to Market Lake—Official Plans.

Omaha, July 25.—General Coppinger left for the scene of the Indian trouble today. He will take personal command of the troops sent against the Bannocks. Gen. Coppinger ordered four troops of the Ninth Cavalry, now stationed at Fort Robinson, to move at once to the seat of war. The troops started at daybreak this morning, going via the Union Pacific to Granger, Poccatello and Market Lake, and thence they will march 120 miles.

Washington, July 25.—The full orders telegraphed to Gen. Coppinger are for him to issue the necessary orders for the movement of such a force of troops as he shall deem requisite for carrying out the request of the department of the interior to prevent a conflict between the Indians and the white settlers, and to return the Indians to their proper reservations.

Cheyenne, Wyo., July 25.—Troops have been ordered out to protect the settlers in the Jackson Hole country, but from advices received late last night, it is feared they will be too late to prevent a battle between the white men and the Indians, which is likely to take place today.

Assistant Secretary Reynolds of the interior department advised Governor Richards last evening that Gen. Coppinger had been ordered to go to the scene of the Indian troubles with troops for the protection of the settlers. The governor was also advised by Gen. Coppinger that four troops of cavalry had been ordered from Fort Robinson, Neb., to the Jackson Hole country. Col. Van Horn, commandant at Fort Russell, this city, has been ordered to have his command in readiness and has seven companies of infantry prepared to move. Col. Thomas Moore, chief trainmaster of the army this city, has two pack trains and field-wagon equipages ready to move.

The only official news from the scene of the trouble received by Gov. Richards yesterday is the following message from Gen. Stitzer of the state militia, who is stationed at Market Lake, Idaho, as the governor's representative to keep him informed of the situation. He telegraphs: "Met Indian captain of police in Teton basin yesterday with thirty-five horses hurrying out with all possible speed. Saw him again at 11 o'clock last night. He says he cannot control Indians, who will fight to-day."

Gov. Richards says he thinks a fight between the settlers and Indians will take place before the troops can get on the ground. If the settlers are well provided with ammunition he thinks they will hold their own until aid arrives. There are sixty-five able-bodied men in the Jackson Hole settlement, all skillful in the use of arms and accustomed to frontier methods. These, with thirty-five women and forty children, are all at Marysville, the only town in the region. To reach this settlement troops will have to be taken from Market Lake, Idaho, overland a distance of over 100 miles. Part of the way is through a very rough country.

FROM AGENT TETER.

Serious Condition of Affairs Confirmed by His Report.

Pocatello, Idaho, July 25.—The Indian troubles in the Jackson Hole country have grown so serious that Indian Agent Teter, on his return from a personal investigation immediately telegraphed the department to furnish him with troops to help quiet the Indians, who are thoroughly aroused over the recent killing of their brother braves, and threaten to wipe out all the settlers in that region. Agent Teter confirms the worst stories about the condition of affairs. Surrounding Jackson Hole there are several hundred of the worst Indians in this country roaming over the territory, and a bushwhacking campaign has already opened. Every time a white man sees an Indian he shoots at him, and the Indians lie in ambush for straggling whites. Mr. Teter believes the cavalry should be sent to the seat of trouble as soon as possible, and the probable route will be through this city and Market Lake.

It is in the rich valley just south of Jackson Hole that the original trouble occurred nearly two weeks ago, when a party of deputy sheriffs surprised an Indian camp and captured all the bucks, sixteen in number. In trying to escape later while being taken to trial, several Indians were fired upon and killed. This was the beginning of what now promises to be serious trouble. Indian agents who have tried to prevent these annual conflicts say they labor under the most ambiguous instructions from Washington. The treaty of 1863 with the Bannocks and Shoshones, which is to be effective until 1898, reserved to the Indians the right to hunt on all unoccupied government lands. It places no restriction as to season or place. The states and territories, however, have game laws that prohibit the killing of elk in the summer.

Jackson Hole Threatened.

Lander, Wyo., July 25.—A letter received here from a Mr. Gustin, whose home is at Lewiston, says that a large number of Indians were seen there Monday going around the point of Wind River, making toward Snake River valley, and as this valley leads to Jackson Hole it was his opinion that they were going there. A guide named Carr made the same report to Capt. Sheldon, commanding the militia at this point. Parties from up Wind River say the route known as Union pass is lined with Indians going in small parties. Yarnell, an old government guide, says that the settlers in Jackson Hole are thoroughly scared, and every care is taken to prevent an Indian surprise.

SAYS HE IS THE MURDERER.

W. F. Barrett Claims to Have Committed the Emanuel Church Crimes.

Santa Cruz, Cal., July 25.—William F. Barrett claims that he is the man who murdered Blanche Lamont and Minnie Williams in Emanuel church in San Francisco. Barrett gave himself up to the chief of police as a dangerous criminal Tuesday night. Yesterday he was discharged as a harmless lunatic. Then he went to the sheriff, to whom he confessed that he had committed the Emanuel church murders. To the district attorney he told a story that at first seemed plausible, but when Barrett went into details of the crime the inconsistencies of his statements convinced his auditors of his perfect innocence and complete insanity.

San Francisco, Cal., July 25.—The trial of Durrant for the murder of Blanche Lamont will be resumed to-day. The district attorney will then present affidavits stating that Durrant can have a fair trial here, and it is expected the motion for a change of venue will be denied. The county jail is besieged by women daily, anxious to see Durrant and to leave flowers for him. In both cases they are disappointed.

SHORT WEIGHT GIVEN.

Spring Valley, Ill., Coal Company's Scales Condemned.

Spring Valley, Ill., July 25.—For the last two years the miners of this city have been loudly crying against a shortage in the weight of the coal they mine. As a consequence, yesterday the inspector of weights and measures swooped down on the scales at No. 2 mine and found them weighing only 1,500 pounds for a ton. He promptly condemned them and ordered the company not to weigh on them until they were made correct, an order, it is alleged, that was not obeyed. In consequence General Manager Dalzell, Superintendent John B. Stone, Weighman Murry, and Pit Boss Stone are under arrest. The trial takes place this morning.

No Fusion in Alabama.

Birmingham, Ala., July 25.—The Populist state executive committee met here yesterday to consider the question of fusion with the Republicans in the next state campaign. Over 100 prominent Republican and Populist leaders were also present. Resolutions were passed leaving the question of fusion to be settled by the state Populist convention, but recommending that a good Populist be nominated for governor and that other places on the ticket be filled by men favoring free silver, regardless of what party they belong to. This displeased the Republicans and fusionists, who say there will be no fusion.

Knights Templars Conclave.

Boston, Mass., July 25.—Preparations are being made for the reception of the army of Knights Templars next month. There will be between 25,000 and 35,000 knights in the parade on August 27, while it is expected that as many more, including the families of the Templars and others will be in the city during the conclave. The committee on accommodations has already made provision for the reception of 20,000 knights, leaving about 200 commanderies to be heard from.

Second Trial of the Taylors.

Carrollton, Mo., July 25.—The jury in the Taylor case was completed yesterday. Prosecuting Attorney Bresnahan made the opening statement at night. The town is thronged with people and there are 300 witnesses for the state and 300 for the defense. Mob violence is feared if the defendants are acquitted, and to prevent it Sheriff George Stanley has sworn in more deputies. The jail is constantly under guard.

More Conservative Gains.

London, July 25.—The pollings for the Parliamentary elections, so far as returned, leave the state of parties as follows: Conservatives, 328; Liberal Unionists, 60; total Unionists, 388; Liberals, 146; Parallels, 10; McCarthys, 59; Labor, 2; total opposition, 217. The net Conservative gain thus far is 81.

OUR FLAG FIRED ON
BY THE SPANIARDSAMERICAN SCHOONER STOPPED
BY A SPANISH GUNBOAT.

Captain Quick, Commander of the Carrie E. Lane, Makes the Complaint—Washington Officials Slow to Blame the Spaniards For What They Have Done.

Breakwater, Del., July 25.—Captain Quick, of the American schooner Carrie E. Lane, upon his arrival here last night had a tale to tell about a thrilling encounter in Cuban waters with a Spanish gunboat. Two shots were fired at the Lane by the man-of-war, and one of the schooner's crew narrowly escaped being killed by one of them. The vessel was made to heave to and give an account of herself before being allowed to proceed.

The schooner was off Cape Antonio and making good time before a stiff breeze, when on the 14th inst., she sighted a steamer flying the Spanish flag following her. While he was making up his mind what course to pursue a puff of smoke curled up over the steamer's port bow and a round shot whistled uncomfortably close to the schooner's mainmast and plunged into the water on the lee quarter. Captain Quick gave the order to haul in sail and bring the vessel to. While this was being done one of the crew ran out on the bowsprit. As he stood there the gun on the Spanish war ship boomed again and another shot sped on its way toward the American craft, this time coming so close to her that the sailor on the bowsprit swears he distinctly felt the wind caused by its rapid flight.

The Lane soon came to a dead stop, and the gunboat drew up under her quarter. A boat was lowered and four Spanish marines, under the command of a lieutenant in the Spanish navy, came aboard. They were fully armed and their leader very civilly lifted his hat and demanded to know from what port the Lane had sailed, and whether she was bound. Captain Quick gave the required information. No further search was made and the vessel was permitted to continue on her course without further molestation.

Captain Quick says that he could not get the name of the gunboat. He adds that after the first shot was fired at the Lane he caused the stars and stripes to be hoisted at the peak, but the only response the Spaniards made was a second shot. The gunboat did not shoot her colors until after the first shot was fired. Captain Quick wired his agents in Philadelphia, and will await advices from them before determining upon a course of action regarding what he considers a Spanish outrage.

MAY HAVE BEEN JUSTIFIED.

Government Officials at Washington Blame the Lane's Captain.

Washington, July 25.—The government officials here have received no information in regard to the firing on the schooner Carrie E. Lane by a Spanish war vessel off Cape Antonio. The general opinion of naval officers who read the report of the affair as described by Captain Quick is that the Spaniard did not exceed his authority in overhauling the schooner, if the latter was in the territory of Cuba. The Spanish government, it is held, is menaced by the danger of the landing of filibustering expeditions on the Cuban coast, and in exerting itself to prevent such landing has a right to overhail and learn the character of any vessel within the three-mile limit that might be suspected of having on board those engaged in designs against the government or a cargo intended for the insurgents. Captain Quick's story shows he paid no attention to the man-of-war for an hour or more. This, it is said, probably caused the captain of the latter to believe that the schooner was engaged in filibustering methods, and prompted him to take decisive action in preventing her escape.

One naval officer was emphatic in his declaration that the captain of the man-of-war was perfectly justified in what he had done. Assuming, of course, that the schooner was within the territorial limits of Cuba, it was the business of the Spanish government to intercept any vessel that might be used by the insurgents.

If any report of the affair be made to the State Department some steps will likely be taken by this government, should the circumstances seem to warrant it. If the statement of Captain Quick that a solid shot was first fired directly at his vessel is sustained, it may make his case a more serious one.

JAPAN DELAYS THE TREATY.

Expects the Support of the New Government of Great Britain.

London, July 25.—A dispatch to the Times from Vienna says that Japan is delaying the negotiations for a new commercial treaty with China and also the execution of the terms of the constitution relating to the evacuation of Liao Tung peninsula, pending the result of the British elections, in the hope that the new government of Great Britain will support Japan against Russia.

A Compromise Likely.

Negaunee, Mich., July 25.—The anticipated ultimatum from Cleveland, where offices of the Negaunee and Ishpeming mines are located, was not given the miners yesterday, but it is expected to-day. It is thought that a compromise between the present wages and the scale demanded will be offered. The Miners' Union, which will embrace mechanics and all mine operatives, was organized with over 2,500 members.

James W. French for Warden.

Washington, July 25.—Attorney General Harmon has announced that he had decided to appoint as warden of the United States penitentiary at Fort Leavenworth, Kan., James W. French, of Indiana. Mr. French was for five years warden of the Michigan City (Ind.) penitentiary.

DID PARENTS HELP
HOLMES KILL A GIRLMRS. QUINLAN IN THE POLICE
SWEAT BOX.

Her Little Girl Disappeared Three Years Ago And Authorities Think She And Her Husband Aided Holmes In Committing Murder—Skeleton Found.

Chicago, July 25.—Mrs. Quinlan, wife of the old janitor of the Holmes building, has been before the police authorities today being pumped. The Quinlans had a little daughter who disappeared three years ago. Holmes had a thousand dollars insurance on her. It is believed that her remains were found yesterday and that the parents were in the deal. Almost an entire skeleton was found yesterday by the crew of men working in the cellar of the Holmes building. Sixty-third and Wallace streets. Shovels and picks were dropped when suddenly Detectives Fitzpatrick and Norton ordered every man to stand back while bones which had been unearthed from the wet slime and quicklime in one corner of the wall were taken out. Several ribs protruded from the earth after about two feet of dirt had been dug away at the corner of the east and south walls. Upon digging carefully around with their hands the detectives took out seven ribs, and several sections of the vertebrae were found and a piece of bone which appeared to be a fractured upper jaw, to which two teeth were still attached. Upon digging further several more ribs were found and a portion of a woman's jacket, with a large sleeve, upon which was a bunch of hair, too much discolored to ascertain its original hue. At the bottom of all a board twenty inches wide and about three feet long below which there was what appeared to be a hard floor, probably the original floor of the cellar, indicating that the dirt had been filled in above the body.

On examination of the contents of the box there was found no chance for error in judging the character of the bones. They were those of a human body, pronounced by Dr. Robinson and others parts of the anatomy of a child between the years of 8 and 13. They consisted of seventeen ribs, three sections of vertebrae of the spinal column, a portion of the clavicle, or collar-bone, and two parts of the ossa innomina or hip bone. Close by the bones were fragments of wearing apparel. At first glance one of these was thought to be a woman's garment trimmed with heavy fringe, giving rise to the rumor that traces of a woman's body had been found, but closer examination showed it was part of a child's cape-coat, the fringed portion being a part of the rotted cloth. The other portions of the clothing were evidently a part of the coat, and were eaten away by decay and the destructive elements of the lime.

The first report that the remains of both a woman and girl were found was sent to Philadelphia. Holmes was taxed with the discovery and made this ingenious, and, in the light of results, convicting explanation: "I was in a game to insure a man, his wife, and a child—their daughter. The whole family was to have been murdered, so to speak, and then we were to have collected the money. The scheme was this: Instead of the people being murdered they were to go away and hide. We were to get subjects from a medical college and chop them up so they could not be identified. Well, I got two bodies, a woman and a girl, from a college, and we kept them in a cold storage warehouse in Chicago for a time. Then we moved the bodies over to the Castle. The scheme fell through and we were obliged to bury the remains in the cellar. What the Chicago police are finding now are the bones of these two bodies. We didn't get all the bodies needed because of the row and the failure of the plan."

Chief Badenoch last night decided to hold Joseph C. Owens and Patrick Quinlan, the two janitors of the building, for further investigation.

Search for Howard Pitzel's Body.

Indianapolis, Ind., July 25.—Detective Geyer of Philadelphia arrived yesterday from Detroit and began his hunt for the body of Howard Pitzel. Geyer says he thinks Holmes murdered Howard in this city. "I feel sure," said Geyer, "that we will find the body of Howard Pitzel in Indianapolis, if I can locate a certain house here which I believe Holmes rented in October, 1893. We will search a thousand houses in this city if necessary."

Holmes Guilty of Murder.

Toronto, Ont., July 25.—The coroner's jury last night returned a verdict finding H. H. Holmes guilty of having murdered Alice Pitzel. The coroner at once issued his warrant against Holmes, and County Crown Attorney Dewar said he would lay the case before the attorney general's department, with the view to having Holmes tried here. No expense would be spared in the case.

MANY BRIDGES WASHED AWAY.
Floods in Colorado Cause Trains to Be Delayed.

La Junta, Col., July 25.—The heavy rains since Sunday have flooded the country east of Neposta to Enkin, Kan., swelling the Arkansas river, which is eighteen feet six inches above the low-water mark at La Junta, four inches higher than ever before known here. The county wagon bridge here, nearly 2,000 feet in length, has gone out and the families in the lowlands have moved to higher ground.

No fatalities are reported, but thousands of dollars' worth of flumes and bridges will be lost. Timpano creek is far out of its banks. The county wagon bridge washed out and struck the Santa Fe railroad bridge a mile below, knocking out two bents and otherwise damaging the bridge so trains cannot cross. The high line and the Holbrook bridges are broken, but not seriously.

FOR SAFETY OF FUNDS.

Representative Klein of Illinois After Trustees of Public Money.

Springfield, Ill., July 25.—A bill was introduced in the house yesterday that provides that every officer charged with the safe keeping of public moneys, who shall loan, use, or convert to his own use, deposit in banks or exchange for other funds than as specially allowed by law, shall be guilty of embezzlement, and for violation of the act he may be sent to the penitentiary for a term not longer than ten years, or fined an amount equal to the sum embezzled. The house resolved itself into committee of the whole soon after it convened for the purpose of considering the revenue bills. Delegations from Chicago were heard on the subject, and when they had finished the house rose from committee of the whole, and reported its progress to the house and asked for further time. The house then took a recess until 3 in the afternoon. When they re-assembled the committee of the whole decided to adopt a section providing for an assessment of real estate every four years. It then proceeded to discuss the other amendments.

There is again indecision and doubt in legislative circles as to what policy shall be followed. After a four-hour caucus behind closed doors yesterday the Senate agreed on a proposition for a recess until November 19. It is impossible to tell how the house Republicans will receive this proposition. If adopted, it is expected that the general assembly will quit Springfield next week. The senate was the scene of a sharp party fight. The republican members were anxious to secure a recess until afternoon, but owing to a disagreement among them the democrats obtained an adjournment after a session lasting barely twenty minutes. A message was received from the house asking concurrence in the Hogan Arbitration bill. Some bills were introduced, and the senate adjourned until 10 o'clock to-day.

MINERS FAVOR A STRIKE.

Officials of the Indiana Union Asked to Call Out the Men.

Shelburn, Ind., July 25.—A mass-meeting of the miners of Star City, Shelburn and Curryville was held here yesterday and delegates chosen to wait on President Purcell and Secretary Kennedy, state officers of the miners' organization, and ask them to order a strike immediately. Upon their failing to comply with the request the delegates were instructed to demand the resignation of both President Purcell and Secretary Kennedy and the surrender of the charter of the different local assemblies throughout the county. The delegates were further instructed to visit the Clinton miners and use all honorable means to induce them to cease work at the 51-cent rate scale. The miners are very outspoken on the action taken by the officers, and denounce the temporary settlement.

Robert J. Makes a Fast Mile.

Detroit, Mich., July 25.—The third day of the Blue Ribbon meeting at the Gross Pointe track was set for the trial of Robert J., against his record of 2:04. The first quarter of the mile was made in 0:37, the second in 1:01, the third in 1:21, and the mile in 2:02, half a second slower than the best time made. The time, 2:02, is, however, the second fastest mile ever made by a horse in harness, and the fastest ever made in this State and is also the fastest made for this season.

Lutherans at St. Louis.

St. Louis, Mo., July 25.—At yesterday's session of the twenty-second annual conference of the German Evangelical Synod of North America at Kapf's Evangelical church many new candidates were received as members of the synod. Mr. Haverkamp, of Albany, N. Y., maintained that parochial schools are necessary for the existence and progress of the church, and he was sustained in this view by the other members of the synod.

Missouri Lynchers Felled.

Mexico, Mo., July 25.—Emmet Divers, the negro who murdered Mrs. John Cain, of Callaway county, after he had assaulted her, was captured Tuesday night. It was learned yesterday that a posse of citizens of Callaway were coming here for the purpose of lynching Divers. To prevent this Sheriff Stephens quietly slipped the negro out of jail and took him to St. Louis.

Severe Washouts in South Dakota.

Chadron, Neb., July 25.—A hard rain starting about 3 o'clock yesterday afternoon near Hot Springs, S. D., caused a rise in Fall river, washing out three bridges and considerable of the grade of the Elkhorn on the Hot Springs branch. The passengers were transferred to the other side of the washout and the trains only delayed a few hours.

Owners and Operators Meet.

Cleveland, O., July 25.—An important meeting of iron mine owners was held yesterday. It is reported that an increase in the wage scale was agreed to, but that it will not be as great as demanded by the miners.

"Soo" Road Raises Wages.

Minneapolis, Minn., July 25.—The "Soo" road has raised the pay of its engineers and brakemen to the schedule in force prior to August, 1893. Other classes of employees will be given similar restorations.

Corbett Injured by a Fall.

Asbury Park, N. J., July 25.—James J. Corbett fell on the bicycle track at Asbury Park yesterday while riding on the wheel given him by Champion Zimmermann a short time ago. He was so badly injured he will not be able to train for several weeks.

Heavy Rain in Michigan.

Traverse City, Mich., July 25.—A good rain began at 7 o'clock yesterday morning and continued steadily for several hours, putting an effectual check to forest fires. This is the first rain of any consequence in two months.

FIFTEEN BLOWN UP
BY A SUEZ BOILEREXPLOSION IN AN EGYPTIAN
MILL KILLS MANY.

Brazil Protests Against the Occupation of Trinidad By the British—Condition of German Crops Said to Be Good—Amnesty is Granted to Armenians.

Suez, July 25.—Fifteen people were killed by an explosion in a mill here. The boiler gave away, spreading destruction among the native workmen.

Brazil Protests to Britain.

Rio Janeiro, July 25.—There is growing excitement in this city over the occupation of the island of Trinidad by the English. The government has dispatched two notes of emphatic protest to the British legation quoting the order of the British Admiralty of 1782, by virtue of which Trinidad was evacuated by the English and restored to Portugal.

Condition of German Crops.

Berlin, July 25.—Official reports show that the condition of winter wheat, potatoes, clover, and hay is good, while summer wheat, winter and summer rye, barley, and oats is medium.

Amnesty for Armenians.

Constantinople, July 25.—An imperial irade has been issued, granting amnesty to all Armenian political prisoners. Many of the latter have already been released.

SLEPT THROUGH A TRAIN ROBBERY
Unaware of Their Danger the Two Boys Enjoyed Pleasant Dreams.

When Frankie and Willie E. d n aughted from the Myers house 'bus yesterday afternoon, they congratulated themselves that they were still alive. Coming here from Buffalo, to visit E. D. Miller, they were on the Lake Shore train which was held up by robbers near Toledo. Dynamite was used and a number of shots were fired, but the boys say they never even woke up. The robbery was 120 miles from Chicago and only a few miles from Archbold. Shortly after midnight as the express was approaching the siding, running about forty miles an hour, Engineer Tiernan noticed that the lamp had been suddenly turned so that the red light shone across the tracks. He knew that this meant that the switch was open and accordingly applied the emergency brakes. The train was brought to a standstill just about the time the engine had reached the approach to the sidetrack. As soon as the train, which consisted of two express cars, two coaches and four sleepers, ceased moving a volley of shots rang out in quick succession. The conductor and the train crew hastened out to see what was the matter, but were glad to make a quick retreat to the cars when they heard bullets buzzing by their ears. The passengers, who had been pretty well piled up by the sudden stopping of the train, were somewhat panicky, but the deafening reports of the cannonade. The robbers poured bullets into the cab of the engine and the engineer was forced to sit in a ditch while they did their work.

Most of the shots, however, were directed at Messenger Nettleton's car. The men ordered the messenger to open the door, but this he refused to do and sent a load of buckshot after them. A moment later the bandits began to use dynamite and after repeated charges loosened the door and a plank on the car. In this way they gained admittance to the express car and held the messenger at bay while they began operations on the safe. The men wore white handkerchiefs over their faces and carried heavy rifles. They succeeded in opening a small safe in the car with dynamite and secured some booty. Then they went to work on the large safe. Several unsuccessful attempts were made to open it with dynamite. The bandits finally abandoned the project of getting into the treasure box and left the train with the small amount of plunder which they secured from the little safe.

LINSON NOT THE MAN.

Little Ida Gebhard's Murderer Not Yet Discovered.

Indianapolis, Ind., July 25.—John R. Linson is still held for the murder of little Ida Gebhard, but the officers have about made up their minds that he is innocent. He says that he can prove that he was in Danville, Ill., when the girl disappeared. There is great excitement in West Indianapolis, where the crime was committed, and many citizens declare that as soon as they are convinced that the officers have arrested the right person they will lynch him if they have to break down the doors of the county jail. Further investigations to-day show the crime to have been of the most revolting character. The little child, after having been assaulted, was mutilated with a knife.

May Order General Strike.

Columbus, O., July 25.—Secretary Patrick McBryde of the United Mineworkers of America has returned from Pittsburgh. He says that if the demand there for an advance in wages on Aug. 1 is not conceded a strike will be the result. The Indiana miners are now out. He says: "If the Pittsburgh operators grant the advance a similar advance will be granted in Ohio and Indiana. If the advance is not conceded and a strike is ordered in Pittsburgh there can be no question that it will extend to Ohio, and, for my own part, I see nothing but the calling of the different state officials together and the ordering of a general stoppage of work."

Forty-Seven Workmen Meet Death.

Vancouver, B. C., July 25.—Japan advices by the steamer Empress of India say the Komatsu coal mine in Yugeta Tagawa district, filled with water July 9. Forty-seven miners are known to be drowned.

P. G. Strickland left this morning on a business trip to Monroe.

NO BALLS FOUND IN THE SKULL

"Newville Mystery" Grows Deeper
and More Growsome.

DR. M'ANUS MAKES A MORE COMPLETE EXAMINATION

If Death Was the Result of a Gunshot Wound or Wounds, The Weapon Used Was of Inferior Penetration, The Ball Took a Very Unusual Course, and Then Became Lost as None Can Be Found—Not Yet Identified.

The more the "Newville mystery" is sifted the more complicated it gets. Whether or not it was a case of murder or suicide is still in doubt and it is possible it is more uncertain now than it ever was.

Dr. W. C. McManus and Marshal Springer of Edgerton came to Janesville yesterday afternoon and from 5 to 6 o'clock were closeted with District Attorney Jackson. Dr. McManus has the remains of the dead man and has made an examination of the skull. The hole in the bones of the eye and nose, he says, were hardly inflicted in his opinion, by a bullet. The hole is not the right shape and the course it must have taken is hardly probable under the circumstances. No ball was found in the skull which further corroborates, in a degree, the theory that the holes were not made by a ball. The bones about the place, where the ball went in, are very thin and the doctor says they may have been bored by insects or worms in the course of decay.

Two shots fired into the same place, one horizontal and the other perpendicular, might have inflicted the injuries found, but in that case the damage done by the balls would, it is thought, have been much more extensive. The hole in the side of the nose at the inside corner of the right eye is a jagged one and longer than it is wide. If one shot had been fired directly into the head, and another at the same spot but in an upward direction, the two might make such a hole. However, it is urged that it would be a physical impossibility for the dead man to have fired two balls into his head and then arrange himself in the position in which he was found, with his feet crossed, his hat tilted back on his head, and his hands in a position of rest. Then no bullets were found in the skull and there are no openings where a ball went out of the skull. If the man died from the effects of revolver shots at the point stated, he must have used a weapon of very inferior penetration, after which the balls must have fallen from the skull, when it became detached from the body, or else they are now hidden in the mouldering flesh etc about the neck. These conditions are both held to be highly improbable, although the body itself has not been examined critically.

The Mystery is Deeper. Thus the mystery deepens. With the theory of suicide by shooting made improbable by the fact that no bullets were found in the skull, and no bullet holes discovered in the clothes, comes the question of the cause of death with more distinctness than ever. It is hardly probable that the dead man took poison because he would have writhed about in the agony of death had he taken anything but a narcotic. Had the latter substance been used, the bottle or paper in which it had been carried must have been found, as the underbrush grew too high, the tops of the bushes meeting the low limbs of the trees, for the man to have thrown a bottle into the river from the spot where he lay, and no vial was found at the scene.

"If it was not suicide by shooting or poisoning, what did cause death?" the people ask. Under these circumstances the belief is justified that it was murder and that the slayer of the stranger carried the body to the lonely spot where it was lying, arranged it in the restful position in which it was found and left their crime to be discovered weeks afterwards.

Remains Not Identified. As yet the remains have not been identified and there is scarcely a clue upon which to work. Sheriff Appleby has run down several stories of missing men only to find that they could not be the stranger. A man who had disappeared from Racine answered the description, but later his body was found in Lake Michigan. Then Mrs. Fulton, who runs a board-

ing house at Milton Junction, advanced the theory that the dead man was Will Ewing, a roof painter who had boarded with her and left suddenly last spring. Ewing left a quantity of clothing and other personal effects at the boarding house, and she was confident that she could identify the clothing, but as yet she has not been to Edgerton, and when Dr. McManus and Marshal Springer visited Milton Junction yesterday, Mrs. Fulton was not at home. Ewing, it was said, had sent some of his laundry work to Madison, and the mark on the handkerchiefs found was believed to be in a Madison laundry code, but of this nothing positive is known. The authorities will sift these clues, but in the mean time, how the dead man died, is as much of a problem as ever.

DOCTORS DUMBFOUNDED.

Mrs. E. B. Dixon, of No. 68 Chatham Street, who has been a helpless cripple, testifies as follows:

State of Wisconsin, County of Rock, City of Janesville, ss.: Personally appeared before me, a notary public in and for said county, Mrs. E. B. Dixon, 68 Chatham street, Janesville, Wis., who, after being duly sworn by me, deposed and sayeth as follows: I have been a sufferer with rheumatism for eight years. My hands and fingers were stiff, my hands were swollen to an enormous size, could not walk without a cane in each hand, could not dress myself, could not sleep and had no appetite and I have suffered untold agony. I was utterly helpless, could not remove my shoes, had no strength in my arms or limbs. I have suffered so much that I was willing to have my toe amputated if I could get any relief. For after consulting Dr. Ego on the 11 of July at the Park House, after a thorough examination he assured me that he could cure me without such heroic measures. And I wish to say that I have doctored and doctored with our home physicians and physicians from abroad, but derived no benefit until I consulted this wonderful healer, Dr. Ego. Thank God that such a man came among us. Now I want all my friends to know that I am going to attend services at the Congregational church tomorrow morning for the first time for nearly two years.

I wish to thank Dr. Ego a thousand times for what he has done for me, for I had given up all hopes of ever being cured. I heartily recommend him to any and all rheumatic sufferers. With thankfulness, I remain, Mrs. E. B. Dixon, Subscribed and sworn to before me this 20th day of July, A. D. 1895. J. V. NORCROSS, Notary Public for Wisconsin.

No wonder Dr. Ego cures these so-called incurable cases, as he commences where others leave off as the doctor has brought an entire new system of treatment from London, England. The doctor has received more sworn affidavits from patients cured here, as well as elsewhere, than any other physician. These sworn affidavits can be seen at his offices in the Park Hotel. The doctor will remain until Monday, the 29th inst., 5 p. m. Remember, patients are treated free. The only expense will be the cost of medicines necessary to effect a cure. Office hours 9 a. m. to 9 p. m.

LEG SHEARED OFF BY A SELF BINDER

R. L. POLLOCK TERRIBLY HURT
WHILE HARVESTING.

Stepped Down on the Pole to Fix the Harness—Horses Started and He Fell in Front of the Sickle Blades—Blood Flowed in a Torrent.

Robert L. Pollock's leg rolled away from his body as he fell on the sickle of a self binder this morning. A stream of blood gushed from the stump. The team felt their driver's hand no longer guiding them, and dashed ahead with the binder into the long grain.

So badly were the bones of the knee crushed that amputation two inches above the knee was necessary. Recovery is probable unless internal injuries have been suffered.

It was on the Pollock farm, five miles southeast of the city, that the accident occurred. About half-past 8 all hands were at work in the field. Pollock, who has been working the place for his father, Robert Pollock, of this city, was driving the binder. Something went wrong with the harness, and he stepped from his seat to the pole to fix it. The horses started, his foot slipped off the pole, and he went down in front of the knife.

Saw His Leg Cut Off.

Farm hands less than twenty feet away saw all this, but it was over in a moment and they could do nothing. For barely an instant there was a muffled catch in the whir of the sickle, then Pollock lay gasping on the stubble with one leg cut off just below the knee, and as cleanly as surgeons' knives could have done it.

There was a torrent-like flow of blood, and the men who ran to the spot tried to check this before doing anything else. They made a ligature of the material at hand and fastened it about the leg, twisting it tight. This rude tourniquet lessened the bleeding and the unfortunate young man was carried to the house while a messenger was sent to Janesville for surgeons. He made the five mile drive in fifteen minutes. He got Dr. Woods who assisted by Dr. Frank Pember and Frank Farnsworth performed the operation. Besides the amputation of the leg it was necessary to sew up a bad wound in the hip.

Dragged By Runaways.

A deep gash across the face required several stitches to close after the leg had been dressed.

Before the doctors left the injured man was able to talk. "The team started to run," he said, "and jerked me off the machine. I clung to the lines and so kept ahead of the sickle as long as I could but finally had to let go. The knife caught me just below the knee and then the machine passed over me."

After running over their driver the horses dashed ahead and crossed the field. They then went into a corn field and ran until the corn stopped them.

Pollock has no family and is twenty-nine years of age. He has been working his father's farm for several years, being very successful.

EXCURSIONISTS TO WAUKESHA.

Rockford and Freeport People Pass Through Here Today.

Just as the accommodation pulled into the city from the north this morning, a long line of passenger coaches rolled into the St. Paul yards from the south. The train contained two hundred excursionists, from Beloit, Rockford and Freeport, on their way to Waukesha. The train stopped here two minutes, but not a single passenger climbed on.

Honesty the Best Policy.

"Yes," sighed the virtuous grocer, "it is really too bad." The honest blood coursed through his veins and lit up his kindly face. MAY BUY NO ROLLER FOR STREET WORK

COUNCIL COMMITTEE BACK
FROM MICHIGAN.

Aldermen In Doubt Whether It Pays to Spend \$3500 On a Machine to Assist in Making Only \$1500 Worth of Improvements—Trip to Rockford.

The question of a steam road roller for Janesville is still unresolved. Aldermen MacLean and Inman, members of the highway committee, who went to Chicago on Tuesday, and Ann Arbor, Michigan, the next day, have returned. Alderman Hemming and Stearns went to Ohio to visit friends. The committee saw one of the O. S. Kelly machines at work on Washington boulevard, in Jackson park Chicago, and at Ann Arbor the Pitts machine was exhibited both as a road maker and as a stone crusher. The aldermen were very favorably impressed with the machines and were unanimous in the opinion that a machine would be a good investment. The committee will probably go to Rockford Monday to see one of the Harrisburg machines in operation. The price of one of these machines is placed at \$3,500.

Opposition to the Purchase.

What report the committee will make to the council is not known, but it is whispered that there will be some opposition to the purchase of a machine at present. Aldermen think the amount of money raised for the improvement of streets will not justify the council in investing a large sum of money in a machine to lay idle. It is claimed that \$1,500 will be the limit of improvements in the several wards. This is not enough to provide road material and labor to keep such an expensive machine busy. While all admit that money is almost thrown away under the present system, some of the aldermen claim it would be better to delay the purchase of a road machine until the charter is amended so that a larger sum of money can be appropriated for street work, or until a new method of keeping up the streets is adopted.

COAL WILL NOT GO UP SOON.

Prospect That the Low Price in Lake Ports Will Continue.

In spite of the predictions of higher prices for coal which have been filling the air ever since the remarkable drop of the black diamond to \$1.75 a ton is still the retail price in Milwaukee and other points on the lake. Well informed dealers state that August 1 will not bring any raise in prices. All grades of anthracite have fallen to \$1.75 and at this price a number of contracts have been let for future delivery as late as Oct. 1. It is said that no efforts can avail to form a combination among the dealers to put the market again on a firm basis.

Today's Sentinel says:

"Some dealers pretend that there is no profit in coal at the present price, and look downhearted at times when asked if they think coal will advance. Meantime they are busier than for a long time, filling orders for present delivery, and loads of stove and furnace coal are familiar sights on the streets in all parts of the city."

FASHIONABLE FANCIES.

White Petticoats Again Worn—Baby's Caps—Medici Collars Revived.

Broad green grass is much used in millinery this season. It is about an inch or a little more in width, an excellent imitation and always used upright in a loop or two with ends, frequently fastened by a paste brooch.

Although fancy petticoats of silk and alpaca, adorned with lace and ribbons, are still fashionable, a great many white muslin ones, trimmed with embroidery, are worn with light gowns.

The little, close Dutch caps are not so much used for babies' wear as they used to be, caps and bonnets of a more elaborate

VISITING TOILET.

character, with wide ruffles and bows, being now preferred. There is nothing much prettier or more infantile than the old fashioned sunbonnet shape, which shields the eyes and neck from the sun. White and ecru embroidery are much employed for little children's wear.

A great many white costumes, especially in alpaca, are seen this season, and mastic of a shade approaching white is also a favorite tint. It goes well with all colors and does not show dust.

Anne of Austria and Medici collars are in great vogue at present, made of guipure, batiste, lace or the same goods as the light dress with which they are to be worn. Bodies of transparent goods, such as mousseline de soie, chiffon and gauze, over a silk lining are as fashionable as ever and very soft and becoming. They have a rather dressed up effect and are more suitable for formal afternoon occasions and evening receptions where a demitoelet is appropriate than for ordinary wear. If the sleeves are of half length, a style now increasing in vogue, the "dressed" effect is increased. Long gloves are worn which reach to the edge of the sleeves.

An illustration is given of a pretty visiting gown of pearl gray silk with red figures. The skirt forms large, hollow plaits diminishing toward the waist, and a point of guipure is placed at the foot of every plait. The blouse bodice has a large, flat double plait back and front, and the shoulders are covered by a large collar of guipure fastened in front with a motif in beads. The draped belt is of cardinal satin and ties behind with a large bow and ends. The short balloon sleeves have guipure cuffs. The hat is of black straw, trimmed with red flowers and black quills.

DRESSMAKING HINTS.

To Make Full Sleeves and Skirts From Scant Ones.

Thrifty women who wish to make over the scantier gowns of past seasons in the present voluminous fashion of skirt and sleeve are often sorely puzzled how to contrive the alterations so that they shall not be self evident, betraying the fact that the costume is a warmed over affair. If the sleeve has been pieced down from the top to give greater amplitude, an epaulet of lace may be added, long enough to fall over the piecing seam, or the epaulet may be made of whatever goods is used for the

PLAID COSTUME.

trimming. From the elbow to the wrist the sleeve may be covered with lace or other trimming, which will conceal piecing or soiled places. Now that bands of horizontal trimming are used for bodices and sleeves there is an excellent opportunity for hiding undesirable seams.

Thin, sheer fabrics are exceedingly popular this summer and are much trimmed with bands of openwork insertion set in the fabric in straight lines or in a pattern forming vandykes or a Greek design. For attempts at this style of decoration to result satisfactorily in an amateur's hands the insertion, whether of guipure, lace or embroidery, should be sewed on the face of the goods in the desired pattern, the goods being then cut away underneath. Allowance should be made for turning under the edge to form a hem where the insertion is sewed to the goods, as otherwise the construction will not be firm.

Today's illustration shows a gown of blue and white checked woolen goods which has large maize bars at intervals. The bodice skirt opens each side over panels of blue cloth, the bodice being buttoned over near the top with silver buttons. The bodice has a short, ruffled basque, and the revers are of blue cloth, buttoned with silver buttons. Between the revers is a full vest of maize surah, which is confined by a belt of blue and maize changeable grosgrain silk closed with a silver buckle. A wide collar of blue cloth covers the shoulders. The gigot sleeves have large blue cuffs fastened with silver buttons. The hat is of yellow straw, trimmed with blue and gray quills.

NOTHING ESCAPES.

The Briarous-Like Clutches of French Taxation.

The New York World says: How to tax the people sufficiently to meet the governmental and military expenses, without burdening them beyond their power of endurance, is a task which gives sleepless nights to the statesmen and lawmakers of every nation in Europe, and is the cause of countless bitter discussions in the various parliamentary bodies of the old world. The French Senate and Chamber of Deputies have finally finished their tinkering with the budget, and the members have gone home to rest. The result of their labors is set forth in a recently published report addressed to the Minister of the Interior, in which there are some curious statistics. The tax on dogs brings in 8,600,000 francs, and is imposed on 2,847,000 canines of all breed and conditions, from the two Chinese edible dogs owned by Walbeck-Rosseu the statesman—which are the only ones on the continent of Europe—down to the swarms of dogs without pedigrees which are among the highest prized possessions of the poor in Southern France as well as elsewhere in the world. The tax on clubs aggregate 1,440,000 francs, which are divided among about 5,000 such organizations, made up of 283,400 members. Billiards and checkers are enormously popular games in France, and the 94,000 places where the former diversion may be enjoyed pay 1,100,000 francs into the governmental coffers. Checker playing is not taxed, though attempts have been made to render that game a source of revenue. The quarter of a million bicycles in France pay the State nearly 2,000,000 francs in taxes. Two hundred and ninety-nine out of the 2,000,000 wheels, however, are growing rusty in the rooms of "ma tante," the Mont de Pieté. Here, by the way, seems to be a new and untapped field. Several touching poems have been written regarding the sorrows of Arabs, elderly ladies and other people when forced to sell a beloved horse, but no one has yet portrayed in verse the bitter pangs an ardent cyclist feels when lack of cash forces him to deposit his wheel as collateral security for a loan. Finally, the tax on horses and vehicles is an annual resource of 16,000,000 francs. There are 1,156,000 horses, 363,180 carriages which go on four wheels, and 1,968,139 which roll upon two.

DEVELOPING PRINTS.

New and Interesting Method of Doing the Work Lately Discovered.

A valuable paper has been read before the photographic section of the American Institute by H. J. Newton, explaining a new and interesting method of developing photographic prints on paper with coal tar products in alkaline solutions. He expresses the belief, from observation and the investigations he has made, that prints resulting by development from bromide of silver are absolutely permanent. The bromide paper was first made in Europe, and the first prints were on imported paper. An important consideration, of course, is the keeping quality of such paper before using as well as after; and as to this the statement is made that samples have been kept some three years and a half without any sign of deterioration being exhibited, the manufacturer also declaring that the material when five years old is as good as when first made. Different alkalies do not perform or produce a uniform effect on paper manufactured at different establishments. Again, the carbonates produce a browner black than the caustic alkalies. But the beauty of a print will, after all, depend to a certain extent upon the bromide in the developer—particularly noticeable being the effect of an addition of bromide of soda to the developer.

METALLIC YARN.

Carpets Now Being Made by Aid of Such Material.

The durability of carpets is now made greater, it is said, by the introduction of metallic yarns in the fabric, greater strength being thus assured than by the simple use of yarns made from animal or vegetable fibres, the idea being, briefly, the foundation of a metal coating on an inferior surface, and weaving the strands in certain proportions. A non-oxidizable metal is employed, and this is dissolved and applied to the surfaces of threads, rendering them like metal in appearance and general characteristics; the metallic composition is said to consist of aluminum, borax, alum, litharge and wax, these, combined with white lead and one or two other substances, producing a metallic coating that is flexible and soft as common paint would be. Set to all appearances the covering is similar to metal, very much resembling aluminum. Various substances are adapted for the core or body of the thread, such as wood, pulp, jute, cotton, flax, etc., and the metallic coating is applied to the yarns automatically, the device for this purpose consisting of a chamber in which the ingredients are placed and through which the yarns are drawn, the coating adhering to the surface of the threads.

Naphtha for Scouring.

The employment of naphtha as a cleansing substance in the scouring of wool is a new method favorably commented upon by the scientific papers. By the use of a pump the naphtha is forced through and through the wool, extracting all the natural oil, it being also claimed that the naphtha does not injure the fibre of the wool, as does alkali cleansing, but leaves the fleece in an actually better condition than when cleansed by any other process. A further valuable feature mentioned of this method is that the grease that is extracted from the wool in a pure state, thereby becoming valuable as a medicinal agent or for a saponification into the purest of soaps. A plant following this method is said to have scoured 500,000 pounds of wool and had saved a product of 80,000 pounds in pure wool oil.

Why Does a Fellow Get Yellow?

You needn't call an answer to this simple conundrum. We know that you know that a fellow—we use the term in no offensive sense—is yellow because he is bilious. In other words, his liver has got out of order, his bowels have become constipated. His skin and eyeballs assume a most unwarrantable yellow. A safe remedy, his tongue puts on a coat of fur, even in the summer time; beneath his right shoulder blade and ribs twinges remind him that a very restless imp is in their immediate vicinity. Now, if this hapless individual will simply procure and use at once Hostetter's Stomach Bitters he'll be all right shortly. Constipation, biliousness, malaria, indigestion, rheumatism, neuralgia and disorder of the kidneys and bladder all yield to this peerless family remedy and preventive. Use it promptly, with persistence and regularity. A wineglassful thrice daily.

OUR regular \$2.50 and \$3.00 shoes are now selling at \$2.00. Lloyd & Son.

Narcoti-Cure

The Only Remedy in the World that Refunds Purchase Price if it Fails to Cure the Tobacco Habit in 4 to 10 Days is

It Cures while You Continue the Use of Tobacco.

The greatest discovery of the age!

A certain, pleasant, permanent cure.

A lifetime's suffering ended for \$5.

Why smoke and spit your life away? Why suffer from dyspepsia, heartburn and drains on your vital forces?

Stop using tobacco, but stop the right way

Drive the nicotine from your system by use of this wonderful remedy.

"Narcoti cure is warranted to remove all desire for tobacco in every form, including Cigar, Cigarette and Pipe smoking, Chewing and Snuff Taking.

Use all the tobacco you want while under treatment, and in from four to ten days your "hankering" and "craving" will disappear—the weed won't taste good. Then throw away tobacco forever.

Narcoti-Cure is entirely vegetable and free from injurious ingredients. It never fails to give tone and new vigor to the weakest constitution.

Remember Narcoti-Cure doesn't deprive you of tobacco while effecting a cure; doesn't ask you to buy several bottles to be entitled to a guarantee; doesn't require a month's treatment; and finally, doesn't enable you to stop tobacco only to find yourself a slave to the habit of tablet chewing.

With Narcoti-Cure, when you are through with tobacco you are through with the remedy. One bottle cures.

Send for book of prominent testimonials like the following:

The Narcoti Chemical Co.,

Springfield, Mass.

Gentlemen—I have used tobacco for over twenty-five years, chewing and smoking every day from 7 a. m. to 9 p. m. stopping only for meals.

On Monday, February 4, I called at your office in Springfield, and bought a bottle of the Cure which I used as directed and on the tenth day the desire for tobacco had left me and has not returned. I did not lose a meal while taking the cure. My appetite has improved and I consider Narcoti-Cure a grand thing.

Very respectfully,

CHAS. I. LINCOLN.

Mr. Frank H. Morton, of Chicopee Falls, Mass., late Inspector of Public Buildings for Massachusetts, says:

I used tobacco for twenty-five years, and was a confirmed smoker. In just eight days' treatment with Narcoti-Cure I was through with tobacco, in fact the desire vanished like a dream.

Very respectfully,

FRANK H. MORTON.

If your druggist is unable to give full particulars about Narcoti-Cure, send to us for Book of Particulars free, or send \$5 for bottle by mail.

RATIO OF 20 TO 1 IN CUBA'S WAR

There are now 40,000 Spanish soldiers in Cuba, and 40,000 more are expected from Spain after the close of the rainy season. This seems a preposterously large number of men for the suppression of the two or three thousand bandits and cattle thieves who, according to official Spanish accounts, constitute the whole force of the Cuban revolutionists. Evidently the outbreak in Cuba has assumed larger proportions than the Spaniards care to admit; and the recent "victory" of General Campos near Bayamo, after a careful sifting of the facts, would seem to have been an only partially successful retreat. The colonial cormorants who have from time immemorial batten upon the substance of the Pearl of the Antilles have apparently deemed it necessary to supplement their policy of plunder by a system of persistent prevarication.

IT WILL COST \$110,000,000.

The commissioners on the part of the United States government who went down to Nicaragua last spring to examine the proposed interoceanic canal route have cautiously made it known that "they think \$110,000,000 is not too high an estimate" of the cost of cutting the big ditch across the isthmus. In 1888 Chief Engineer Menocal estimated the total cost of a Nicaraguan canal at \$64,000,000. Three years later these figures had expanded to \$90,000,000; and now the engineers who have just been over the ground think that an estimate of \$110,000,000 is not too high. If the work shall proceed at the rate of progress made during the past eight years, and the estimates of cost continue their recorded rate of increase, the date of the probable completion of the canal and the ultimate cost will form a very interesting problem.

A COSTLY STRIKE

The strike of the iron ore miners in the Lake Superior region places the mine operators in a perplexing predicament. The fact that contracts were made before the revival of business had set in practically debars this industry from a participation in the benefits of advancing prices, and the demand of the miners for an increase of wages adds greatly to the embarrassments of the situation. The miners are asking that which their employers cannot concede except at actual loss in the operation of their mines. The solution of this problem will be awaited with much interest by the iron trade.

CIVIL SERVICE VETERANS

As long as the civil service rules were being extended to employees of the pension agencies why were pensioners not included? The employees now will be protected in their tenure of office against everything but death, resignation and misdemeanor or neglect of duty. With the pensioners it is different as numerous examples in Rock county show. Merit plays no part in the pensioner's case as long as a Georgia reformer wields the ax at Washington.

Senator Sherman says Mr. Cleveland's cabinet officers let him make them mere clerks. They do, Senator, they do. And we have an idea that that is what they were selected for.

MISS CORNELIUS TO REMAIN

Former Janesville Music Teacher Will Not Return to Janesville.

Miss Eulalia V. Cornelius writes to Janesville friends that she will not return to Janesville next fall as she had intended. Miss Cornelius is now at Statesville, N. C., where her parents reside, and as they, and many of her friends urged her to give up the idea of leaving home again, she finally consented. She writes that she has secured a large music class at her native city, and that the closing of the college at that place, makes the field a good one. Miss Cornelius made many friends during her stay in Janesville and as her qualifications are of the best, she will doubtless be as successful in Statesville as she was in the Bower City. Her Janesville friends and acquaintances will regret her decision, but all will wish her success in her present field.

DUMPHY'S POISONED DOG KILLED.

People Thought The Canine Was Mad Because He Foamed at The Mouth.

Patrick Dumphy's dog was poisoned this morning, and as he tore about the yard with foam falling from his jaws, the neighbors thought of course it was mad. They appealed to Mr. Dumphy, and as he realized that all was not right with the canine he asked Chief Acheson to kill it. The chief told Dumphy to kill the dog himself, and he would see that he was not prosecuted for shooting inside the city limits.

ALLEYS ARE IN POOR SHAPE.

Rear of Some of the Janesville Hotels Need Looking After Very Much.

Complaint has been made to the city authorities that alleys in the rear of business blocks and especially around some of the hotels, are in very bad shape. Even in the residence districts families have allowed refuse barrels to overflow awaiting the visit of the wagon, and the hot weather causes odors anything but aromatic to arise.

The Bargain Hustler on The Trail.

This is intended as a photograph of our Hustler in quest of more stock. The rain has disfigured the picture, but we have great faith in him and think he will turn some one over at 40 or 50 cents on the dollar before returning. Wait for surprises and watch our ad. We never sleep and never eat. Lowell Hardware Co., two stores, Milwaukee and River streets.

For the table tomorrow a nice lot of fresh trout and whitefish at Dunn Bros'.

Paces All Around Joe Patchen. Freeport, Ill., July 25.—Ten thousand people saw John R. Gentry pace all around Joe Patchen yesterday at Taylor's Park. The race was three heats in five, and John R. Gentry won the first three.

Perfectly Satisfied.

Crack Boat Builder—Ah! How do do, Mr. Richman? How did that row-boat I made you last summer suit? Mr. Richman—Perfectly. Crack Boat Builder—Ah! I'm glad to hear it. I always like to give satisfaction. Suited perfectly, eh? Mr. Richman—Yes. I left it in front of my boat-house all summer, and every scallawag who tried to steal it got upset or drowned.

Building Loan Associations.

Cleveland, O., July 25.—The third annual convention of the United States league of building and loan associations convened in this city yesterday. About 100 delegates were present, representing about 2,000,000 persons, whose investments amount to nearly \$500,000,000.

THE MULCAIRNS ROW AGAIN IN COURT

FIRE ALARM CASE ONLY THE BEGINNING.

Patrick Came Before Judge Phelps Today Charged With Swatting Thomas With a Flat Iron—Mother Refused to Furnish One Hundred Dollars Bail For Her Son.

When Patrick Mulcairns went home drunk and assaulted his brother Thomas with a flat iron at one o'clock in the morning of July 5, he did something that he now regrets. During the melee, it will be remembered, Thomas became frightened and turned in an alarm of fire, for the purpose, as he stated, of "calling the police." For this unusual way of summoning the officers he was fined by Judge Phelps and afterward made a complaint against Patrick charging him with committing an assault with intent to do great bodily harm. Patrick was before Judge Phelps in the municipal court this morning for examination and the court found that an offense had been committed. Mulcairns was held for trial in the municipal court at 10 o'clock in the forenoon of July 31, bail being required in the sum of \$100. Mrs. Mulcairns refused to sign the bail bond this morning and said that she simply wanted her son to "get out and keep away."

THE Chicago Horse Review devotes a page in this week's issue, to the Janesville meeting. The articles are well written and the illustrations are from photographs taken by their staff correspondent. CRITIC IS SCORED BY H. D. M'KINNEY

INTER OCEAN MAN ARRAIGNED FOR INACCURACY.

While Posing as Infallible He Made Bad Breaks On Important Facts—Chicago Horsemen Stand By the Janesville Secretary—Klamath a Great Horse.

H. D. M'KINNEY writes to Chicago concerning criticisms on the Janesville meeting. Part of his letter is printed in the Chicago Record as follows:

"Possibly you may have noticed the article in the Inter Ocean last Sunday. If published in a home journal I would have paid no attention to it, but I must confess I feel very much annoyed that such an outrageous denunciation should appear in one of the leading journals of the west. So far as 'wrangling with the crowd and scolding across the track,' it is false. On but one occasion did I address myself to the few remaining to see the conclusion of a race. It was then 7:30. After announcing the result of a heat I stated that before the time for starting another heat it would be too late to start the horses. Then there was an expression of disapproval by the few remaining and the writer of the Inter-Ocean letter was profane, abusive and conspicuous. I requested the police to suppress the fellow and remove him from the stand."

Never In The Same Race.

In commenting upon the Inter Ocean writer's criticisms on the racing Mr. McKinney is sarcastic and hits hard, as the following extracts will show:

"His garbled report of the race 'between Prairie Lily and Pearl C.' is an eloquent exposure of his mental condition, as Pearl C. and Prairie Lily were never in the same race."

Correspondent Boylan said of the Kate Phallamont and Silena F. race:

"H. D. McKinney once owned Kate Phallamont and drove her one season."

"I never owned her," Mr. McKinney remarks, "and never drove her. John Chadwick never owned her, as he also states."

"Mr. Colby who drove Kate, will make oath that he never told Dugbar that he (Dunbar) had won. Captain Taintor, who owns Selma F., sat near the wire: when asked by his son who won, said 'Kate won.' George Fuller and his son Charley, who were near the wire told me Kate won; but that is not worth mentioning as in a close finish there must be divided opinion."

McKinney Needn't Worry.

The Record says: "Mr. McKinney also writes that the Janesville meeting was a success in every sense of the word. He is greatly impressed with Klamath and regards him as 'a very great horse,' a testimonial very favorable to the California wonder. The Janesville turfman is a good judge of the trotter and believes that Klamath is sure to give some of the first class trotters an argument before the season closes. Certain it is that the Inter Ocean's report of the Janesville meeting was decidedly mixed up, and the criticisms were unwarranted. However, the strictures on the managers of the meeting will cause nothing but amusement with horsemen. The comments upon the Prairie Lily and Pearl C. race were senseless for the reasons given by Mr. McKinney. The success of the Janesville meeting shows not only Mr. McKinney's popularity with horsemen, but his great ability as secretary."

NEW DESK FOR THE TREASURER.

Fathers Is Proud of Handsome Oak Furniture In His Office.

City Treasurer Fathers now has new furniture in his office in the city building. The old table desk has been thrown out and a handsome oak combination desk and counter is in its place. This stands well out in the room, giving the treasurer plenty of space for his business purposes, besides the desk and counter is so arranged that it fences up the vault, and a handsome railing on top protects his books and papers.

Song and Dance Man Skips the Town Owing Several Bills.

It seems if the strangers who have been boarding in town of late have made it a point to fight shy of their board bills. He came here with the races and went away in debt to several besides his land lord.

UNITED IN A LIFE TIME BOND.

Shaw-Campbell.

Marriage vows were taken by Edwin Shaw, of Milton, and Miss Nellie R. Campbell, of the town of Harmony, at 7 o'clock last evening, being administered by Rev. A. Porter, of the First M. E. church, assisted by Rev. G. W. Burdick, of the Seventh Day Baptist church, Milton Junction, uncle of the bridegroom. Every preparation had been made in the way of decoration of the home and lawn, and every provision for refreshments and gratification of the guests, as was fully appreciated by all present. The bridegroom is the popular professor of Latin in Milton College, and the bride is the accomplished daughter of Mr. and Mrs. Jay Campbell, of the town of Harmony. The bride received many valuable presents, and the happy couple have the best wishes of a host of friends.

A BOY PICKPOCKET SENTENCED William Blakemore Will Serve the State For Two Years.

Rather than have his father in Chicago know of the trouble he was in, William Blakemore, the nineteen year old boy who picked Mrs. Thomas Butter's pocket pleaded guilty to the charge at 4 o'clock this afternoon. Judge Bennett sentenced him to two years in state's prison. That was the way Blakemore put it, but skillful questioning by the court developed the fact the Blakemore boy was not quite so innocent as he assumed to be. The judge offered to suspend sentence until he could investigate the lad's record, but Blakemore preferred to accept sentence, which he did without changing a muscle.

STAGE TEAM RUNS ON COURT STREET

JOHNSTOWN HORSES "TAKE IN" THE TOWN.

Rapid Whirl of City Life Too Much For Them and They Take Advantage of the Confidence of Their Driver—Not Much Damage Done.

The Johnstown stage horses started on a dead run from the corner of Jackson and Court streets this morning. The driver had left the horses for a moment and started after them just in time to see them smash into a buggy in front of Browell's grocery. After demolishing that vehicle they crossed the lower bridge and turning down Franklin street made Monterey. They were stopped on Western avenue.

A horse belonging to J. Wright was left standing on South Main street this morning and started to run. As the outfit passed S. Henderson's meat market it collided with a buggy belonging to Harry Reynolds but aside from the general loosening of the spokes, no damage resulted. The horse ran up Main street to Prospect avenue where it was brought to a standstill.

'ALL SOULS' The Peoples Church

Carlyle was right. "THE AWFUL UNBELIEF IS UNBELIEF IN ONE'S SELF." Let us learn to trust ourselves. If we cannot believe in our own rectitude, if we dare not obey our own reason, if the inner voice of our private conscience speaks to us in vain, then are we lost indeed.

The mind of man, when it is true to itself can be trusted. Avoid prejudices. Let no "system" rob you of your personal power. Be true to the truth as you see it, and greater truth shall come to you.

Who is it will not dare himself to trust? Who is it hath not strength to stand alone? Who is it thwarts and balks the inward MUST? He and his works, like sand, from earth are blown."

PRENTICE &

HAIL THROUGH THE ROOF.

The Family Saved Their Lives by Crawling Under the Beds.

One of the worst hailstorms this section has experienced in many years passed through a portion of San Patricio and Neuces counties last Wednesday night about 9 o'clock, says the Corpus Christi Caller. The hail, which was followed by a heavy rain, lasted only a few minutes, and while it covered a good piece of territory, the destructive part of it was only about two miles wide, commencing in San Patricio county, about Meansville, and passing south across Nueces Bay into this county, taking in on its march the farms of J. H. Roark, John Dunn and others in that neighborhood, west of the city. Mr. Roark, who was in town last evening, says the hailstones came down straight through the roof of his house, broke out thirty lights of glass and destroyed a good portion of his crop. The worst report of all comes from Meansville, about seventeen miles from this city, at the head of Nueces Bay, where hailstones fell as large as goose eggs and completely ruined the farms of C. L. Moore, R. A. Anthony and A. Willinson. Mr. Moore, who arrived in Corpus Christi last night, gives a very sorry account of the terrible storm, which completely ruined him. He says he is left without a dollar. Last Wednesday he had growing nicely between ninety and one hundred acres of cotton, besides several acres in melons and other products. He had a good home and felt easy. That night the hail came and swept all his crop away except two acres of potatoes and one-half acre of ribbon corn. The hailstones came down through the roof of his house, making holes large enough to throw a cat through them. His wife and children had to take refuge under the bed. His mother, aged ninety-eight years, saved her life by getting under the bed also. The family were nearly frightened to death, and his wife is laid up in bed from the effects of her experience, though his mother stood it well. The large hailstones, which were of all shapes, tore the roof off his kitchen, and dining-room, broke all his dishes, killed his chickens and turkeys, which, if they could have been spared to him, would have helped him make a living. Mr. Moore says that after the storm was over the hail could be seen banked up in the yard like snow. When he left home yesterday at 11 o'clock a mass of hail was seen at the corner of his house as large as a bucket. His animals suffered the least; the storm blew his fences and pig pens down and his stock ran among the timber and escaped with little injury.

MISS WHITE AND MISS PINK.

Teachers Who Wear Different Colors for the Purpose of Identification.

Two public school teachers in this city are twins and their resemblance is marked, says the New York World. They are the Misses Fanny and Amelia Purple. They teach in grammar school No. 45, in East Twenty-fourth street, as substitutes. Miss Fanny, after teaching for some weeks, was taken ill, and her sister took her place. The pupils didn't know the difference. Neither did the principal, Mrs. Tate.

"Why, Fanny, I thought you were so sick that you could not leave your bed," said Mrs. Tate to Fanny's sister. She was assured that Fanny was sick.

After this episode the two sisters, who had dressed alike, wore different colors. Amelia chose white and Fanny pink, and thereafter they were known as Miss White and Miss Pink. This did not help matters much, so far as the true identity of the young ladies was concerned, for it was necessary to remember the color Miss Fanny wore and that adopted by her sister. Mrs. Tate told a World reporter yesterday that the resemblance between the two young ladies was as great mentally as it was physically. They not only had the same likes and dislikes, but their intellectual capacity was the same. When they were graduated from the Normal college they got the same percentage. They are inseparable. Their parents are dead. They live with their uncle, Dr. Purple, a well-known physician.

CLERK WAS TOO ABRUPT.

Unknowningly Spoke to President Cleveland in a Very Impertinent Manner.

Once in awhile President Cleveland gets by Mr. Thurber and invades the room occupied by the subordinate clerks in the white house. On one of these occasions recently he went and stood looking down at the work which one of the clerks was doing. The man at work never looked up. He thought it was one of the other clerks who occasionally bothered him. "What the devil do you want?" he asked. There was no response. The other clerks gasped for breath. A deathlike stillness prevailed, and the working clerk looked up to meet a smile on the countenance of the president. In time an explanation followed, but it will be a long time before that white house clerk will ask a like question until he is dead sure of the man he is talking to.—Washington Star.

Rapid Rail-Rolling.

"A record for rapid rail-rolling," says the Engineering and Mining Journal, "was made by the south works of the Lackawanna Iron and Steel company at Scranton for the week ending March 9. The converting mill made 6,042 tons of ingots in eleven turns and the south rail mill rolling 5,201 tons of finished rail."

Protection in France.

Octrol duties, the tax on eatables, wines and liquors, fuel and building materials entering a town are levied in 1,518 municipalities in France. Last year the gross receipts from the duties were \$63,000,000 and the cost of collection \$6,500,000, or nearly 9 per cent. Paris alone paid \$30,000,000, nearly half the whole amount, and over \$10 a head for every inhabitant, while the average of the other towns is \$5 a head.
